To print size successfully, please use a paint program
to set resolution to **215 DPI** (dots per inch)
Please turn off any auto-scaling or auto-sizing feature in your paint program or printer drivers.

Use the custom pricing editor on the pinball machine.

Set quarter mechs = 3 Pulses
         dollar mechs = 12 Pulses
  (typical coin door: left=**3**, center=12, right=**3**, fourth=n/a)
Set one credit to be 8 Pulses   This works because partial credits are cleared after Ball 1 ends.
